About me

I am a 4th year student of Computer Engineering at Bartın University. I joined the Siber Vatan project in 2020. I received Linux, Network and CEH trainings. After attending the trainings, I started to improve myself in the field of Cyber Security by participating in CTF competitions and doing research. Together with 2 friends, we are working on our Tübitak project on Cyber Security. I am currently developing myself in the field of Web Security. We are working on projects related to Web vulnerabilities with Yavuzlar, the Web Security team under the Siber Vatan project. In May 2022, I was selected for the Cyber Take-Off trainings organized by THY Technology and received online trainings on different topics for 1 month. After the online trainings, I was selected for the camp program and received trainings on 13 different topics for 15 days.

Eğitim

Computer Engineering, *Bartın University* — 2019 Sep – Current
Bartın, Türkiye

Experience

Cyber Security Intern, *Cyrops* — 2022 Nov – Current

Abilities

- Go Programming Language
- Python Programming Language
- PHP Programming Language
